Zoom System Requirements: iPhone, iPad, iPod Touch

If your iPhone, iPad, or iPod Touch includes the following features and software, you can use it with Zoom.

Hardware / Software

iPhone 3GS with no front-facing camera, iPhone 4 and later, iPod Touch 4th generation and later, iPad 2 or later, iPad Pro, iPad mini

SOFTWARE: iPhone, iPod Touch, or iPad running iOS 8 or later. iPad running iPadOS 13 or later.

BROWSER: Safari 5+ or Chrome

PROCESSOR: 1 GHz or greater single-core processor (non-Intel)

BANDWIDTH:
Zoom can automatically adjust for Wi-Fi or 3G. If you're connecting via Wi-Fi, you'll need:

- 600kbps for one-to-one calls with high video quality and 1.2 Mbps for HD calls.
- 600kbps or 1.2Mbps for group calls with high video quality. 1.5Mbps to use gallery view in group calls.

If you're not sure if your internet speed is adequate, there are lots of different speed tests available online. Some popular options include Fast (https://fast.com/) and Ookla (https://www.speedtest.net/).

Tutorials Overview
Please see the tutorials for step-by-step Zoom instructions.

Below is a snapshot of what the tutorials offer:

How to Download & Install Zoom & Create a Zoom Account on an iPhone & iPad

If you want to install and use Zoom on your iPhone or iPad, visit the App Store and download Zoom Cloud Meetings (Free). Once you've downloaded and opened the Zoom app, it's time to create an account.

Keep a record of your Zoom Account username and password.
